Safe Patient Ratio

What Sets Our Pediatric Intensive Care Unit Apart

In our 34-bed PICU, our PICU nurses are trained to care for some of the sickest pediatric patients. Nurses choose to work in the unit because of the diverse patient population, high-acuity levels and the opportunity to continually learn.

Your shift is led by a charge nurse as well as a team leader that functions as a resource to the entire staff.

Our PICU team works closely with the CICU and the NICU, and often, our nurses float between the three intensive care units when additional help is needed.

- Numerous bedside procedures performed on a daily basis
- Serve as the Rapid, Code and Trauma Team for Oklahoma Children's Hospital

Unique Clinical Care You Will Provide

- PICU RNs run continuous renal replacement therapy
- PICU RNs have the opportunity to run ECMO
- PICU RNs train in utilization of a high-frequency ventilator

About Oklahoma Children's Hospital OU Health

Oklahoma Children's Hospital OU Health is the state's only comprehensive, freestanding pediatric hospital in the state. We serve the state and the region with the state's most comprehensive NICU (level IV), region's only pediatric heart center, region's only pediatric BMT and CAR-T therapy program and state's only level IV pediatric epilepsy center. Additionally, we uniquely serve women and babies by providing complete high-risk pregnancy and labor and delivery care in the hospital.
